

Fraser Specialty Products (FSP) has been one of North America's foremost suppliers of quality wood siding and cedar shingles for more than 15 years. And since the very beginning, FSP has been proud to offer the Western Red Cedar shingle as part of its product line. In its natural, unfinished state, this wood native to the continent's western and pacific regions has a richly textured grain. Its warm, mellow color tones range from light amber to deep honey brown.

Western Red Cedar is an extremely durable wood that contains natural oils that act as preservatives to help the wood resist insect attack and decay. It is also a dimensionally stable wood that lies flat and stays straight. These characteristics, combined with Western Red Cedar's natural insulation properties make shingles made from this versatile wood a preferred material for outdoor applications.

Western Red Cedar Shingles

From premium Grade 1 for sidewalls and roofs to utility Grade 4 for undercoursing.

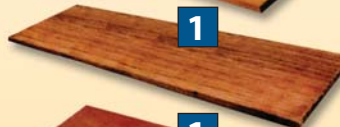

Western Red Cedar Shakes

HANDSPLIT SHAKES
These shakes have split faces and sawn backs. Premium and Number 1 Grades.

TAPERSAWN SHAKES
These shakes are sawn both sides. Premium and Number 1 Grades.

TAPERSPLIT SHAKES
Produced by hand, using a sharp bladed steel froe and mallet. Premium Grade only.

STRAIGHT-SPLIT SHAKES
Produced by machine or by hand, without the taper from end to end. Premium Grade only.

Specialty Western Red Cedar Shingles

R&R SHINGLES
Primarily used for sidewall applications, Rebutted and Rejoined Shingles are also available with a smooth sanded face.

MACHINE GROOVED SHINGLES
Manufactured as an R&R shingle with one face striated for a length greater than the maximum exposure. For sidewall applications only.
